

- 1.
- 2.
3. Norman Spear
4. It's a form of "insta-separatism". No one needs to move until the plan is activated.
5. 
6. They all agree on the area that they'll take over. That's good and a monumental task in itself. But easier when you don't need to move until it becomes unavoidable emergency. This could only happen at the regional level in USA i think.
7. But I think it could be successful on USA despite that limitation. Focusing regionally isn't much of a limitation at all practically speaking.
8. It would be very straightforward proposition and recruiting pitch that many would find attractive i believe.
9. It might not work in every region for demographic and/or geographic/terrain reasons however
10. Nevertheless it'd probably still be quite a task getting everyone to agree on an identified location even in the same region. And where would everyone live when they got there? I didn't ask that question.
11. I assume it would require investing in real estate in the collective bug out area.
12. Or having large land plots where owners would allow other members to live.
13. In any case terrain considerations like defensibility and adequate food production would need to be taken into consideration seriously.
14. It would be an interesting war game exercise to try to identify suitable areas in each major region of the United States
15. silverPopo
16. The biggest problem is the money issue
17. 
18. We need a lot of money to even start doing it
19. Norman Spear
20. Yeah money is going to be important
21. 
22. silverPopo
23. People can be convinced in a matter of days
24. 
25. Norman Spear
26. People will need to pay into it

27. 
28. silverPopo
29. But getting a few million \$\$ for such project won't be easy
30. 
31. Norman Spear
32. True
33. 
34. I doubt we could get 400k people to sign up even nationwide though
35. Maybe closer to 50-100k and that's probably too optimistic
36. They'd need to be White Nationalists, they'd need to be somewhat Siege-pilled even if not consciously
37. How many people like that exists in USA even without wanting to participate in such a network? What the size of the potential recruiting pool?
38. We'd need to scale the size of the collective bug out territory to the amount of people able to fund it and defend it
39. So money aside, how many of that 100k max would be willing and able to fight?
40. silverPopo
41. Everyone would be willing to fight depending on comrades around them
42. 
43. We just kinda suck at organization
44. Partly because it's a taboo, partly because we keep infighting
45. Most groups we make break up due to infighting
46. Norman Spear
47. Yeah probably most would be willing to fight especially if they have invested money into it. And investing money might keep the org together because it won't be easy to just leave
48. 
49. silverPopo
50. Another issue is Feds
51. 
52. They also make people paranoid
53. And if they are actually around they stir shit
54. Norman Spear

55. That's always an issue but nothing would be illegal in the planning and preparation phases

56.

57. I don't see anything illegal in the Suidlanders plan if applied to USA

58. silverPopo

59. But most people don't trust others enough to trust them with money

60.

61. For example pay 3k \$s

62. Norman Spear

63. Right that's true

64.

65. silverPopo

66. And most people on here are pretty young so not much money available

67.

68. Norman Spear

69. Maybe the Suidlanders are successful because things are more dire there

70.

71. silverPopo

72. Around 17-25 range

73.

74. Yeah

75. Norman Spear

76. It could start now with the understanding that it would need to slowly ramp up over time

77.

78. silverPopo

79. Things have to get dire and we need a clear leader

80.

81. Norman Spear

82. It would be a longterm project for sure

83. 
84. silverPopo
85. It may be easy to say just go lone wolf but in reality even non-Lemmings need a leader
86. 
87. Norman Spear
88. Lonewolves won't survive alone for too long I don't think especially if they have a family to take care of
89. 
90. silverPopo
91. Yeah
92. 
93. That's why I think it's not viable
94. Hygiene will also be a problem
95. People don't usually talk about how important hygiene is in case of the collapse
96. So it would probably be beneficial to be near some river
97. Norman Spear
98. Some form of community seems like the best most logical option. The question is how to make it happen if it's even possible at all.
99. 
100. One statistic I'd be very interested in knowing is how many White Americans own a bug out location.
101. Like explicitly a location they own with the intention of evacuating to in a SHTF scenario
102. Obviously you need to guess but is it even 1 million?
103. \*forced to guess
104. For that matter how big is the prepper community in America? That estimate might be available somewhere online
105. I mean how many serious preppers regardless of if they're planning to bug in or out
106. Whatever those numbers are the majority are CivNats maybe up to 90%
107. But let's be less conservative and say 20% of the White prepper community in America are explicitly WNs or have strong WN sympathies.
108. \*strong
109. Now divide that number by the number of regions on USA
110. \*in

111. silverPopo

112. Well the thing is there are less than a million people who have a location for when SHTF

113.

114. There are more than a million who want a place but can't be bothered/have no means

115. Norman Spear

116. Ok that second group has inherent potential though

117.

118. So 200k WNs who want a bug out location & maybe another 50k max that actually have one currently

119. So 250k all together as potential recruits

120. Spilt across multiple regions. So to keep the mental exercise simple let's say evenly divided by 5 regions

121. That's 50k per region.

122. Not bad actually.

123. Now our of that how many could we actually get to participate (putting the money issue asise so assuming ww can offer free location somehow). I'd say no more than half but probably closer to 25%.

124. \*out of

125. So somewhere around 25k per region. That's not terrible at all.

126. I'm not saying we should really try to do this just thinking out loud

127. So now reverse engineer that number for each region to identify a suitable location that can sustain that number and is reasonably defensible

128. Obviously the region would contain civilians who were not part of the network because our people would need to be interspersed for practical reasons regarding acquiring property ahead of time

129. \*The regional location would contain

130. Theoretically it's doable I think.

131. But maybe not realistic for the reasons you mentioned.

132. Dwarf

133. I mean, this isn't too bad an attempt at that plan anyways. Of course this is less a bug out focused group, but it's still a good test.

134.

135. Norman Spear

136. The follow on idea is that we would end up controlling/ruling those areas after collapse

137.

138. Use them as a foothold for offensive ops eventually

139. Final step TOTAL ARYAN VICTOR

140. \*Y

141. That's just for a total collapse scenario. Although it could work similarly with partial collapse & even partial slow collapse I think

142. It's essentially the Butler Plan but without needing to move immediately and in multiple regions theoretically

143. doomsayeth

144. Yes

145.

146. I think it is a concept worth wargaming seriously.

147. For example, at my BO I have the resources to supply quite a few people.

148. If there was even a mild disruption and people felt it was worht it to leave the cities, for safety or other reasons, in a matter of months, depending on the number of people, it could definitely become a regional power center.

149. Because while everyone else is struggling to understand what happened, we would already be in the organizational/ operational phase.

150. Now ifnwe had the resources to repeat that in even 10 regions within a few hundred miles of eachother, and a good system of comms

151. We gain a significant amount strength with relatively small numbers.

152. That's why like the suidlanders model

153. They have a great backup comm system in place.

154. I may be mistaken, maybe you know d00mr , but I think their members pay dues to support the organizational infrastructure? If I remember correctly.

155. Norman Spear

156. Yeah it makes alot of sense

157.

158. And seems viable on paper at least.

159. Although your location is a great real life example.

160. Of what's possible.

161. juppi

162. How should I try to come up with comrades that I can trust in a time of need? I have few friends who lean to WN/NS mindset but they will not break away from the system or even try to prepare for a SHTF scenario. I believe that my changes of survival alone will be really small if It comes to it.

163.

164. Norman Spear

165. Potential comrades are out there it just takes time to find them. In your particular case i would contact NRM or whatever they're called now in Finland

166.

167. juppi

168. Will do. Still haven't put out any posters due to no printer available

169.

170. Norman Spear

171. Also I'm still keeping an eye out online for other Finnish recruits.

172.

173. juppi

174. Same here. Mainly through twitter though so its hard

175.

176. Norman Spear

177. We'll find them eventually I'm sure.

178.

179. I have personal motivation there too because Finland is right next door to me so i consider it part of my region

180. juppi

181. Yeah it really is. Lets make a small camp out on a small island with that Estonian guy too.

182.

183. Norman Spear

184. Yeah that would be cool

185.

186. silverPopo

187. I would suggest recruiting through discord as well

188.

189. The app is obviously jewed but a lot of WN/NS types are there

190. juppi  
191. I don't belong to any group in that app. How would I make contact with anyone there?

192.  
193. silverPopo  
194. I can give you an invite to one of the servers if you want

195.  
196. <https://discord.gg/RpDSDQ>  
197. That server is only NS or wanting To learn tho  
198. juppi  
199. I will make a more OPSeC friendly discord account first

200.  
201. silverPopo  
202. Yeah just make one with protonmail

203.  
204. And don't tie anything to it  
205. juppi  
206. that's my plan. I would consider my self a NS but I guess Its up to them to decide.

207.  
208. silverPopo  
209. Well guys in vetting will usually be assholes to newcomers to make sure thin skinned people don't get in

210.  
211. So keep that in mind

212.  
213. juppi  
214. Alright.

215.  
216. juppi  
217. There goes

218.   
219. Norman Spear  
220. Reminder book club tonight at 10pm EST on Discord  
221.   
222. <https://discord.gg/jgMSTjz>  
223. Discussing through section 3 of Siege by James Mason

312.           \*\* Unable to decrypt: The sender's device has not sent us the keys for this message. \*\*

313.           Re-request encryption keys from your other devices.

314.           ?

315.           E

316.           Norman Spear

317.           I mean we can do voice anytime for any reason it's fine

318.

319.           elksworth

320.           \*\* Unable to decrypt: The sender's device has not sent us the keys for this message. \*\*

321.           Re-request encryption keys from your other devices.

322.           ?

323.           E

324.           Norman Spear

325.           If there's more secure options we should use them though nw hey make it any easier for our enemies.

326.

327.           \*Why make it

328.           cadiantrooper

329.           This is something we talked about in the call today. 200 KSK special forces soldiers are alleged to have plotted assassinations of several leftist politicians in Germany.

330.

331. doomsayeth

332. Weird.....I couldn't find any other reference to that 200 German special forces incident

333.

334. Besides that daily mail clip

335. Some tricks are afoot

336. cadiantrooper

337. Information is pretty scarce on this. I'm going to see if Twitter has any other info. It's a pretty big deal, but it doesn't feel right. 200 is a big number of special forces soldiers to kick from your armed forces

338.

339. elksworth

340. \*\* Unable to decrypt: The sender's device has not sent us the keys for this message. \*\*

341. Re-request encryption keys from your other devices.

342. ?

343.

384.

E

385.       Ƴ Hyperborean Mick 𐀀

386.       Thank you, I look forward to being a part of this and getting the Volk actively involved in training/self reliance

387.

388. Norman Spear

389. Ψ Hyperborean Mick ლ: Welcome. I'll add you to some more rooms now.

390.

391. cadiantrooper sent an image

392.

393. Decrypt Screenshot\_20181110-040738.png (1.1 MB)

394.

395. The car's on fire

396. And there's no driver at the wheel

397.

398. Decrypt Screenshot\_20181110-041126~2.png (618.18 KB)

399. And the sewers are all muddied with a thousand lonely suicides

400. And a dark wind blows

401. juppi

402. Is this happening right now?

403.

404. cadiantrooper

405. This is footage from Ventura County in California from the past two days.

406.

407. I'll post the song I'm quoting from in the Music channel. It's called Dead Flag Blues.

408.

409. Decrypt Screenshot\_20181110-041548.png (818.18 KB)

410. I'll post the lyrics there as well.

411. Norman Spear

412. This video gives good aerial overview.

413. <https://youtu.be/TkqyeGte7xw>

414.

415. cadiantrooper

416. That's the video I sent the first screencap from.

417.

418.

419. I'm reading the One Year of SHTF In Bosnia article right now.
420. <https://www.silverdoctors.com/gold/gold-news/one-year-in-hellsurviving-a-full-shtf-collapse-in-bosnia/>
- 421.
422. QUOTE
423. "Money soon became worthless. We returned to an exchange. For a tin can of tushonka (think Soviet spam), you could have a woman. (It is hard to speak of it, but it is true.) Most of the women who sold themselves were desperate mothers.
424. Arms, ammunition, candles, lighters, antibiotics, gasoline, batteries and food. We fought for these things like animals. In these situations, it all changes. Men become monsters. It was disgusting.
425. Strength was in numbers. A man living alone getting killed and robbed would be just a matter of time, even if he was armed.
426. Today, me and my family are well-prepared, I am well-armed. I have experience.
427. It does not matter what will happen: an earthquake, a war, a tsunami, aliens, terrorists, economic collapse, uprising. The important part is that something will happen."
428. Norman Spear
429. Primary takeaway: avoid populated areas
430. Second takeaway: be a sniper
- 
- 431.
432. cadiantrooper
- 433.
434. QUOTE
435. "You must own small, unnoticeable items. For example, a generator is good, but 1,000 BIC lighters are better. A generator will attract attention if there's any trouble, but 1,000 lighters are compact, cheap and can always be traded."
- 
- 436.
- 437.
438. This next one makes me want to find a guy who knows a guy
439. QUOTE
440. "After the war, we had guns in every house. The police confiscated lots of guns at the beginning of the war. But most of them we hid. Now I have one legal gun that I have a license for. Under the law, that's called a temporary collection. If there is unrest, the government will seize all the registered guns. Never forget that."
441. Norman Spear
442. We have twice the challenge... We need to survive *and* win
- 
- 443.
444. "At first, the weak perish. Then, the rest fight."
445. cadiantrooper

446.

447. According to the man telling the story, this was in a town of only 5000 people but it got that bad.

448. So yes.

449. Any major city is a kill zone waiting to happen.

450.

451. Norman Spear

452. Isolated in the mountains/hills is best

453.

454. As far as bug out locations are concerned

455. But to win requires offensive ops of some nature even if piggybacking on a spontaneous crisis scenario

456. In this guy's example that would mean taking total control of the village

457. How many guys would be required to take over a village of 5000 most of whom are armed and hate racists?

458. \*evil nazis

459. Take and hold the village permanently?

460. I'd assume that at least have the population would evacuate if they can or die of disease hunger etc so that would make it easier somewhat

461. cadiantrooper

462. Now I have an excuse to buy 1000 lighters.

463.

464. Norman Spear

465. Haha you mean you haven't yet???

466.

467. cadiantrooper

468.

469. I have not bought 1000 lighters all at once. I'd get the see through ones so the people I barter with don't hassle me about whether it's been half-used already.

470. How would you take a village of 5k though? If they hate us? Do they have to hate us or can we picture a scenario where their instincts tell them we're their last best hope?

471.

472. Half used Bics with solid color that you can't see the fuel level on go to the people we feel like ripping off.

473. Norman Spear

474. That's a good question. How much will ideology even play into when the situation is that desperate

475.

476. Might makes right

477. cadiantrooper

478.

479. Ideology and Identity will be everything.

480. If you had a town of 5000 people with 51% Liberal Democrats, 40% Republican 6% Patriot Militia 2% Radical Left and 1% Nazi, how does that play out?

481.

482. Norman Spear

483. Antifa cells vs patriot militia vs nazis

484.

485. cadiantrooper

486. Let's assume that the town is all-white to keep things simple.

487.

488. Norman Spear

489. Most people won't fight and will run

490.

491. Evacuate the town in large numbers

492. The Antifa and patriots will stand ground

493. The remaining population will have loyalties divided proportionally between the 3 factions

494. Some patriots would probably join us

495. cadiantrooper

496. Democrats are pansies. Antifa will put up a nasty fight. Maybe not. Hard to tell. it's difficult to map their power level. I think the Patriots could end up being a bigger obstacle.

497.

498. Norman Spear

499. I agree

500.

501. Patriots would put up biggest fight

502. In rural areas at least

503. cadiantrooper

504.

505. Lol maybe we just roadblock all the egress points and make the Democrats barter their way out.

506. "PAY THE TOLL, LIBERAL!"

507.

508. Norman Spear

509. I like that idea. what if we successfully take the village at first and then the patriots come back eventually with a stronger force

510.

511. cadiantrooper

512. The unaffiliated non-ideological gangs are something to consider too. He mentioned groups of guys who would prey on people in the streets.

513.

514. Norman Spear

515. Yeah just straight up criminals

516.

517. cadiantrooper

518. There's a significant portion of the population that is so trapped in the system that they resort to basic predatory instinct. Restoring order, getting those guys off the streets. Might be a determining factor. It involves sticking our necks wayyyy out, but also sounds like the right thing to do.

519.

520. Norman Spear

521. To take control they would definitely need to be dealt with

522.

523. cadiantrooper

524. Again, I wasn't in Bosnia in the early 90s. Maybe that wasn't an option at the time. They just had their block patrol and that's what they could handle.

525.

526. Norman Spear

527. Yeah it sounds like they were just in survival mode

528.

529. Not really thinking politically

530. At least in that guy's case

531. cadiantrooper

532. [05:53](#) He said the government took their guns away as soon as the war came.

That wouldn't fly in a pro-gun state right? Think that might be a cultural thing over there?

Black market firepower?

533.

534. Norman Spear

535. [05:55](#) I'd like to think there'd be some resistance.

536.

537. cadiantrooper

538.

539. I like that idea. what if we successfully take the village at first and then the patriots come back eventually with a stronger force

540. We'll re-enact the gun battle in the mall from Dawn Of The Dead.

541. You forify and then pick the place where they will break through ahead of time.

542.

543. Norman Spear

544. Yeah good defensive planning would be key

545.

546. silverPopo

547. What we really need is organization

548.

549. We are already stronger than average antifa/patriot individually

550. We just need to organize

551. Norman Spear

552. Yes I'm assuming in this hypothetical scenario we would be organized already

553.

554. But you're right it's not something we should assume will just happen

555. cadiantrooper

556. silverPopo: Is there a style of organizing you had specifically in mind? Many people have tried and failed before us.

557.

558. silverPopo

559. That's what we need to figure out

560.

561. We need to be better organized, own specific areas which can produce food and etc

562. How we can do it is a different topic

563. cadiantrooper

564. We had a pretty good discussion about the Sudlander plan. Apparently this thing took 20 years to prepare.

565.

566. Arcturus

567. I think just knowing guys in your area and having a common bug-out location is a good idea.

568.

569. To start, that is

570. That appears to be a lot of the sudlanders plan

571. Beyond that, honestly hard to say. Each locale will be different

572. not just in terms of terrain, but what needs to be done in each town et

573. \*etc

574. I think in a collapse scenario what would have to be done to attain power would be pretty straightforward

575. for the most part establish law and order, what that exactly means depends on where you're at

576. cadiantrooper

577. I live in one of the most densely populated and anti-gun states in the country. That needs to change asap.

578.

579. The Bosnian paints a grim picture and that's in what I would consider to be a small population town.

580. Arcturus

581. Also a different people, to be fair

582.

583. bosnians were probably stronger of will and more willing to do violence than most americans

584. cadiantrooper

585. One part stood out about safehouses attracting as little attention as possible. Any safehouses we have should look like shit at a glance. A boarded up and abandoned house from the outside. Maybe throw some graffiti on it to drive the point home

586.

587. Arcturus

588. Yes and no

589.

590. I think if it truly looks abandoned, you run the risk of druggies and vagrants taking up shack in it

591. before you need to bug out, that is

592. If you've got good security though that risk can be mitigated I imagine

593. cadiantrooper

594. It's an option. Plenty of boarded up houses out there. Plenty perfectly livable on the inside Also, if everything of value is locked up it won't incur loss. Evicting the squatters won't take much time either. The sound of a round being chambered has this effect on people y'see.

595.

596. Norman Spear

597. Tactical considerations aside surviving is only half the battle. Unless we plan on taking and holding a very limited amount of territory in each region indefinitely.

598.

599. If so we won't be much better off than today

600. We could all go live on a big compound right now.

601. What would be the difference qualitatively?

602. Arcturus

603. But yeah, a boarded up shack with a large cellar or something could be an idea.

604.

605. We'd live free of niggers for a year or so before we get waco'd

606. Norman Spear

607. That is a silver lining yes.

608.

609. cadiantrooper

610. Cooperation increases potential for productivity. I'll give you an extremely mundane example. At my job, we lift a lot of things. Some objects require 4 men to lift, one on each corner.

611.

612. Some are extremely bulky/heavy and require as many as 8.

613. Norman Spear

614. I'm not arguing against cooperation. I think it's necessary regardless

615.

616. I'm just wondering what the desired end state look like

617. cadiantrooper

618. That's why I say hell yes, I'm in favor of a compound.

619.

620. Norman Spear

621. Yeah i suppose if we can live under our own rules size doesn't matter much beyond practical living space considerations

622.

623. Like enough land for growing food etc

624. cadiantrooper

625. End state would be the expansion of territory where it's within our means to acquire it.

626.

627. Norman Spear

628. Ok

629.

630. cadiantrooper

631. Farmland would be a good idea if we are going in that direction. Do we have anyone in Big Sky country on here?

632.

633. Norman Spear

634. In that case it's probably better to secretly set up near small population centers so we could just take them over entirely and have everything there at our disposal

635.

636. But property and set up caches etc

637. \*buy

638. Bug out there when the time comes and assume control

639. cadiantrooper

640. That sounds workable

641.

642. Norman Spear

643. We could give the locals an option to stay if they acquiesce

644.

645. Arcturus

646. We'd need the locals either way tbh

647.

648. I don't think we could just roll in and say this is ours, if you don't like it you can get out

649. without locals we could not fully utilize the resources

650. Norman Spear

651. Blitzkrieg

652.

653. Yeah possibly

654. But what if they put up a fight?

655. Arcturus

656. it would be better to ingrain yourself as a community leader prior to collapse and naturally come in

657.

658. Norman Spear

659. Oh ok

660.

661. Arcturus

662. that's why I'm saying we can't just say its ours

663.

664. invariably they will, and they will outnumber us

665. also breeds resentment

666. "you killed my billy!"

667. etc

668. Norman Spear

669. Right. Seems logical but again there will be elements that won't want us there

670.

671. Arcturus

672. hell, could even become the county sherriff

673.

674. prior

675. Norman Spear

676. that would definitely help.

677.

678. Arcturus

679. Sure. Frankly our beliefs don't have to be front and center though imo

680.

681. if it's a small town it will probably be 99% white anywyas

682. \*anyways

683. you could implement policies without explicitly calling it NS

684. cadiantrooper

685. At what point would our beliefs be front and center? Is the optics debate bottomless?

686.

687. Arcturus

688. in a way, yeah, it is

689.

690. Norman Spear

691. At some point certain situations will force our hand inevitably

692.

693. cadiantrooper

694. Arcturus: I'm not getting pissy about that. I can play the game. It's just frustrating as hell.

695.

696. Arcturus

697. brainwashed americans will never accept the label of national socialism without being subjugated imo

698.

699. Norman Spear

700. Although the break down of artificial civilization will force most to live an NS lifestyle organically

701.

702. Arcturus

703. They probably will, yes. I think if you gain their trust in your leadership prior you may have less issues though

704.

705. Maybe not, I don't know. But a bloody rule shooting anyone who disagrees would be short lived imo

706. It really depends on how power is achieved. I think some kind of separatist revolutionary movement while the system is still up, that can work. People who care so much will just leave.

707. Norman Spear

708. Seems like there are PoCs and race mixers even in the smallest of communities these days. We'd need to deal with them outright, no?

709.

710. Arcturus

711. Assuming control of a small town post collapse though, I think it'll be an entirely different dynamic. The first is explicitly gaining territory. Second would be more akin to providing leadership where there would be none.

712.

713. First you can appear alien, second, I don't think you can.

714. You would have to deal with them, yeah. I think it depends on how you do it though. Honestly not sure on that one.

715. cadiantrooper

716. I'm thinking back to our 4th Generation War readings. The general population and their political opinions are a crucial element of the battlefield. That came up a lot.

717.

718. Arcturus

719. Honestly wonder if that would apply in such a situation though

720.

721. I think post collapse - at least immediately - ideology will matter much less to normal people

722. My point is more in not making yourself appear like an outsider in such a scenario, which espousing NS would do because people are hardwired against that

723. be someone they can identify with, someone whom they can follow

724. Norman Spear

725. It would inevitably come to the fore as we rebuild i imagine

726.

727. Arcturus

728. If they're receptive to it you could even slip in innocuous things, shifting the overton window within that community. In time perhaps you could speak openly

729.

730. People may just accept it like the lemmings they are

731. Yeah. I figure that would be some time down the road though

732. we'd waste decades relearning what was basic shit

733. actually rebuilding may not take place till 50-100yrs down the line

734. I don't know. I'm sure as an alternative if your preps are good enough and you have a large enough community of us you could slowly accept normies among the ranks provided they go along to get along with our ideology

735. in time they'd become believers just based on exposure theory

736. Norman Spear

737. Yeah as long as they don't actively oppose us it doesn't matter

738.

739. We'd need a mandatory re-education program for the kids

740. Arcturus

741. Yeah

742.

743. Also citing 4GW - it speaks a lot of not making yourself appear antagonistic to the populace lest you make more insurgents
744. espousing an alien ideology they're brainwashed against would do that IMO
745. it's different if they come to you though. That's their choice and if they're desperate enough they may do it. = less resentment
746. invade their town and change their way of living dramatically = resentment
747. have enough people resent you for long enough, possible civil war or sabotage if you war with another "tribe"
748. or throats get slit at night
749. cadiantrooper
750. Just for the sake of my own sanity, I'm going to accept that a decent portion of the population is going to see us as The Asshole in all these scenarios and will try to murder us.

- 751.
752. Arcturus
753. fair enough, yes

- 754.
755. maybe I'm wrong about all of this, I don't know. Just throwing out a different perspective
756. Norman Spear
757. When a bunch of outsiders show up and start giving orders there will be resentment regardless.

- 758.
759. Arcturus
760. Yes. That's why I think you ought to get in positions of leadership prior if at all possible to not appear as an outsider

- 761.
762. Norman Spear
763. Wtf I can't decrypt my own messages

- 764.
765. Ok working now
766. So given all this, back to my original question —How many of us to control a town of 5000 hypothetically speaking?
767. juppi
768. I would say atleast 30 men with good equipment

769.

770. Arcturus

771. If we're well organized and plan an attack well, 200.

772.

773. I'd guess at least as many men would resist if you were to take it head on

774. juppi

775. Well head on there's no change without the nubmers

776.

777. numbers\*

778. Norman Spear

779. Using the magic 3% calculation 150 would active resist out of a population of  
5000

780.

781. juppi

782. There's no way all 5000 would fight. Women, children and bug men would flee  
when fighting starts

783.

784. Arcturus

785. Could be more or less, depending on the demographics

786.

787. if it's older people less would resist

788. Norman Spear

789. [07:26](#) We'd have the upper hand with the surprise element on our side

790.

791.

792. Arcturus

793. [07:41](#) Maybe, yeah. Depends on how dispersed the residences of those who  
would resist are as well as if we know who would resist

794.

795. Norman Spear

796. Would there be significant disadvantages to just setting up a big self sufficient  
off grid compound that could accommodate 50 of us and our immediate family

members?

797.

798. Assuming we had the money.

799. Although lack of money could be disadvantageous enough

800. Arcturus

801. If we weren't going to get raided by ZOG, no

802.

803. that would be the better way to do it imo

804. like I said with letting them come to us

805. totally different dynamic

806. though honestly, I don't know, it may not be THAT hard to do if you had people located in the same area

807. have everyone own a tent, initially sleep in it, if you have enough land it'll work fine

808. you don't really NEED houses at first

809. just need food and water

810. in time post collapse you can erect buildings and such without fear of interference from ZOG for it being a compound or whatever

811. just have one guy own the land, maybe with a cache of supplies whatever on the land, maybe a large house for himself (ostensibly)

812. Norman Spear

813. Yeah so it would be a group bug out location that we'd develop gradually

814.

815. Arcturus

816. basically yes

817.

818. it would not immediately be a wall fortified village lmao

819. Norman Spear

820. Right

821.

822. Probably never really.

823. But eventually have adequate defensive fighting positions etc

824. Arcturus

825. In time no doubt it would

826.

827. If you live in the right area for it that is

828. PNW collecting wood for walls would be easy as fuck relative to other places

829. same for water

830. though food may present an issue

831. Norman Spear

832. The more we can rely on natural terrain features the better rather than building a wall necessarily although i don't think a wall is necessarily a bad idea

833.

834. Taliban for example

835. Mountains etc

836. Arcturus

837. I agree. Walls always help though, especially when you're probably looking at going back to spears and bows

838.

839. Norman Spear

840. Catapults!

841.

842. This is sounding better and better

843. Arcturus

844. yeah lets see mongoloid normies get catapults for centuries

845.

846. Norman Spear

847. Haha

848.

849. Arcturus

850. if you see things going that way honestly hoarding books on shit like that would be a good call

851.

852. Norman Spear

853. I don't want to think about a world without small arms ammo

854.

855. Arcturus

856. could hoard black powder guns and make your own ammo for that

857.

858. Norman Spear

859. If other countries outside of USA are somehow still intact we could resupply although we'd also need money for that.

860.

861. Arcturus

862. more importantly shipping lines

863.

864. IF they are (big if), we'd have to control a lot of territory to have that happen

865. thinking Asian countries may be those still standing, so west coast coastline

866. probably an established port

867. all that would be decades down the pipe from collapse - assuming they don't invade the US if they're still standing

868. Norman Spear

869. I imagine there'd be a thriving black market eventually

870.

871. Arcturus

872. which they may not be able to if their oil supply is cut off

873.

874. Norman Spear

875. So we figured out the solution to a sudden SHTF scenario. Next up: Slow collapse. And then finally the "No collapse" scenario.

876.

877. Arcturus

878. hint: slow collapse and no collapse have the same solution

879.

880. Norman Spear

881. Yes

882.

883. Norman Spear

884. What's the maximum practical distance from the bugout location to make it viable for our guys in a region to get there in an emergency? 100 miles, 200 miles, 500 miles?

885.

886. Arcturus

887. I'd say 50-100 ideally

888.

889. 200 is feasible

890. Norman Spear

891. Ok. Let's say 200 for now.

892.

893. Ψ Hyperborean Mick 𐌹

894. \*\* Unable to decrypt: The sender's device has not sent us the keys for this message. \*\*

895. Re-request encryption keys from your other devices.

896. ?

897.

898. \*\* Unable to decrypt: The sender's device has not sent us the keys for this message. \*\*

923. ?

924. Norman Spear

925. Are you foreseeing commune type of arraignments? Also are you not as focused on survivalism as much as living green?

926.

927. I see your comment now about not aiming for communal living.

928. I guess I'm just wondering what your primary orientation is, survivalism or sustainable living or some combo

929. Υ Hyperborean Mick ㄥ

930. \*\* Unable to decrypt: The sender's device has not sent us the keys for this message. \*\*

931. Re-request encryption keys from your other devices.

932. ?

933.

934. Norman Spear

935. Ok

936.

937.       Υ Hyperborean Mick 𐌲

938.       \*\* Unable to decrypt: The sender's device has not sent us the keys for this message. \*\*

939.       Re-request encryption keys from your other devices.

940.       ?

941.

942.       Norman Spear

943.       Ok i see what your saying

944.

945.       doomsayeth

946.       Lots of planning go on this morning

947.

948.       Norman Spear

949.       Spit balling but I think some things stuck

950.

951.       doomsayeth

952.       Yeah, read through most. Lots of ground was covered.

953.

954.       Norman Spear

955.       The conclusion we reached is that to prepare for a sudden SHTF crisis self-sustaining communes used as bugout locations are best

956.

957.       Majority of people wouldn't live there fulltime. Rather like Suidlanders they would bugout there when necessary.

958.       doomsayeth

959.       Yeah, that is the approach that I support the most as well.

960.

961.       But I would say the BO locations can be as far away as 500-600 miles

962.       And may even be preferable, since you need to go far to get away from population clusters.

963.       For example my BO is abiu 530 miles from where I currently live, and takes about 6 hours to reach under normal travel conditions.

964.       But its worth it to be so remote

965. You just need to cache supplies at certain intervals along the route  
966. In secret places but that evwryone in the network knows.  
967. Norman Spear  
968. Yeah makes sense  

969.  
970. How many acres do you have?  
971. doomsayeth  
972. 40  

973.  
974. 24kw off grid solar power  
975. With battery bank  
976. Norman Spear  
977. Theoretically how many people could that sustain in your estimation?  

978.  
979. doomsayeth  
980. Solar powered well tied into one of the best freshwater aquifers in the country.  

981.  
982. Sustain as far as power needs?  
983. If you're looking at contemporary power usage  
984. Norman Spear  
985. Just in general to live there. I'm not trying to get you too commit to anything.  
Just wondering what land size might be realistic in general.  

986.  
987. doomsayeth  
988. The average U.S. household used about 14kw of power a day.  

989.  
990. Norman Spear  
991. I'm thinking more food and water  

992.  
993. doomsayeth  
994. One family can easily farm and live on an acre

995.

996.

Norman Spear

997.

Ok

998.

999.

That's what I was wondering

1000.

I've seen another estimate that was approximately 1.25 acres per family

1001.

doomsayeth

1002.

Only about 30 axres of my property are usable currently

1003.

1004.

So about 30 families

1005.

I have food and water for my own family to last for at 2 years

1006.

a. at least

1007.

Thats if we fail to become self sufficient with our gardening or livestock

1008.

In that time period

1009.

But long term food storage is easy

1010.

Rice and beans are cheap, and so are canned meats. And they can all be stored for very ling periods of time.

1011.

If there was enough interest I [would.build](#) a large bunker/root cellar for potential comrades to store food in.

1012.

Norman Spear

1013.

It's something we should probably consider

1014.

1015.

I would aim for similar set up on my land in PNW

1016.

doomsayeth

1017.

Obviously the more land you can get for a family above one acre, the better

1018.

1019.

legionnaire14

1020.

\*\* Unable to decrypt: The sender's device has not sent us the keys for this message. \*\*

1021.

Re-request encryption keys from your other devices.

1022.

?

1023.

1024.

Norman Spear

1025. Yes

1026.

1027. They would only be used in an emergency

1028. doomsayeth

1029. A productive family using square inch gardening methods, Aquaponic, and co-OP livestock, could produce enough food for themselves and possibly 1 to 2 other families on just 1 acre

1030.

1127. ?

1128. doomsayeth

1129. You will if there is an emergency.  

1130.

1131. Imo, If you want to start prepping there are three areas where you should focus. 1. Weapons/ammunition 2. Food/water 3. Tradeable items ie. Medical supplies, alcohol, fuel, etc.

1132. Norman Spear

1133. What's the minimal infrastructure for making land worth defending? If that makes sense.  

1134.

1135. In other words, beyond whatever the raw land yields. If people are going to hunker down and potentially risk their lives defending an area it should at least have some minimal benefits.

1136. If not there's not a clear reason to even but land when you can just go to a spot in a National Park for example

1137. \*buy

1138. Dwarf

1139. super basic stuff is being at the source of a river, so uphill of the water source rather than downhill. having height vantage point, but also having multiple routes of escape

1140.

1141. if you're hunkering down, the land should be decent enough for basic defensive positions to be made

1142. One guy on YouTube I like is called SecurityGuy42

1143. Norman Spear

1144. Right. I mean why not just find free land that has those requirements?

1145.

1146. Dwarf

1147. He's goes into militia stuff, weapons training, etc. including defensive structures.

1148.

1149. Yeah that's true.

1150. Norman Spear

1151. To me the obvious answer is some kind of improvements and infrastructure that you couldn't have otherwise

1152.

1153. Dwarf

1154. East Coast niggas have the Appalachian trail and other parks in those areas.

1155.

1156. Norman Spear

1157. What would that be at a minimum?

1158.

1159. Right

1160. Lots of National parks

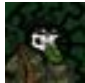

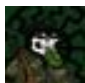

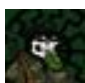

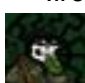

1161. Dwarf

1162. I'd say atleast a good area of coverage, should be able to see around you. However it should also be concealed, so some form of tree cover.

1163.

1164. Caves or depressions into a hill or mountain would also be pretty good, since you wouldn't necessarily have to mess the land up.

1165. juppi  
1166. Supply of fresh water is also a good thing  
  
1167.  
1168. Dwarf  
1169. Should be close to water source, and pretty good distance off the beaten path.  
  
1170.  
1171. Norman Spear  
1172. So why buy land at all? What's the advantage?  
  
1173.  
1174. Dwarf  
1175. That way no randos walk up on you.  
  
1176.  
1177. Norman Spear  
1178. But in a SHTF scenario all kinds of randos will be interested in you  
  
1179.  
1180. And they'll be no laws to stop them  
1181. Dwarf  
1182. Makes sense. I'd rather train on a piece of land that's mine though.  
  
1183.  
1184. Just pre-collapse of course  
1185. Norman Spear  
1186. I'm wondering about post collapse specifically  
  
1187.  
1188. Dwarf  
1189. Iirc another survivalist has base camps set up all around his area of Alaska  
  
1190.  
1191. Has them marked with a GPS.  
1192. Some are caves, some are long term shelters, etc.  
1193. Norman Spear  
1194. doomsayeth: any thoughts? I know you have alot of experience with building infrastructure.

1195.

1196. doomsayeth

1197. I really want to jump in to this convo but im out at the store with the fam.

1198.

1199. Norman Spear

1200. Ok no worries

1201.

1202. juppi

1203. Land you have should be used to build shelters etc

1204.

1205. And you should do it before the collapse

1206. Norman Spear

1207. Ok good. Shelters. What else?

1208.

1209. Defensive positions I think

1210. juppi

1211. Those too

1212.

1213. Norman Spear

1214. Hidden food stores & weapons/ammo caches

1215.

1216. Probably the shelters are the most compelling reason

1217. The rest could be done on public land in a remote spot

1218. Y Hyperborean Mick A

1219. \*\* Unable to decrypt: The sender's device has not sent us the keys for this message. \*\*

1220. Re-request encryption keys from your other devices.

1221. ?

1222.

1223. Norman Spear

1224. Yeah good point

1225.

1226. I guess as an alternative though for those who can't purchase land finding a remote spot where you can at least set up semi-permanent shelters and the rest might be a viable option

1227. Somewhere on public land

1228. Obviously it would take a thorough recon job to find a suitable location

1229. You'd be sacrificing comfort significantly right from the start however and I can see how that might have a detrimental psychological effect as far as morale is concerned.

1230. It'd be alot more reassuring if you didn't need to worry about a roof over your head after escaping whatever chaotic and deadly disaster area

1231. Also electricity seems like it would be important longterm and that's not something that can easily be done post collapse

1232. Y Hyperborean Mick A

1233. \*\* Unable to decrypt: The sender's device has not sent us the keys for this message. \*\*

1234. Re-request encryption keys from your other devices.

1235. ?

1236.

1237. doomsayeth

1238. This is one of my facorite topics

1239.

1240. \*favorite

1241. And I can give you an amazing example of why you would only want to put food stores/ wepaon caches etc. On privately purchased property

1242. A member of a group that I was part of found an old abandoned mine system in a national forest.

1243. It was off a never used trail and in an extremely inaccessible area. There was no hiking trails, offroad trails, anything within many miles

1244. So he thought it would be the perfect place to cache supplies and bug out to if SHTF.

1245. He spent almost 10 years driving supplies out, a generator, etc. In his 4x4. He told me he could have lived there for 20 years with no problems.

1246. He visited the site monthly to check for signs that anyone might be going by etc.

1247. A telephone company conteactor doing a survey for a potential fiber optic line found his site and reported it to BLM.

1248. EVERYTHING he had stockpiled was confiscated.

1249. And because some of the wepaons he cached were illegal in the state  
1250. Norman Spear  
1251. Oh fuck  
  
1252. doomsayeth  
1253. He could not claim it  
  
1255. Norman Spear  
1256. Wow that really is an excellent example  
  
1258. I would've never of considered that either  
1259. doomsayeth  
1260. And even if he could have claimed it , Cali is a government of incompetent  
1261. criminals, he would never have got any of it back anyways.  
  
1262. Y Hyperborean Mick ㄥ  
1263. \*\* Unable to decrypt: The sender's device has not sent us the keys for this  
1264. message. \*\*  
1265. Re-request encryption keys from your other devices.  
1266. ?  
  
1267. doomsayeth  
1268. Maybe even went to prison for some bullshit made up crime  
  
1270. Y Hyperborean Mick ㄥ  
1271. \*\* Unable to decrypt: The sender's device has not sent us the keys for this  
1272. message. \*\*  
1273. Re-request encryption keys from your other devices.  
1274. ?  
  
1275. Norman Spear  
1276. So essentially your saying take advantage of whatever legal protection is a  
1277. available now and inherent in private land ownership

1278.

1279. doomsayeth

1280. Yes, but if you want to build permanent infrastructure, IMO it has to be on private property

1281.

1282. Yes. Small caches on public land that you can write off, perfect.

1283. But long term preps and infrastructure, not worth the risk.

1284. Norman Spear

1285. Just the time invested alone is a lot and you might not have time to start over again

1286.

1287. doomsayeth

1288. Exactly

1289.

1290. \*exactly

1291. Norman Spear

1292. Or at least be as prepared as you could have been because some random as Dwarf points out might mess with your site

1293.

1294. doomsayeth

1295. The state will confiscate your preps based on bullshit code violations. I've seen that as well.

1296.

1297. Almost happened to me because of an unpermitted solar system.

1298. The system does not want you to leave. And since hardly anyone ever does

1299. You never hear the horror stories about people who do

1300. But they are there.

1301. Yes dwarf is right about that as well.

1302. Even renegade former group members might wreck your site for revenge

1303. Seen that happen as well lol.

1304. Norman Spear

1305. So this brings me to a related question: how do you protect your privately owned site when you're not there for most of the time. I'm not asking for you to reveal

your specific security measures of course but if you could give a generic answer or tips that would be good.

1306.

1307. Assuming the land is fairly remote

1308. Like the land I'm looking at is somewhat remote but there are neighbors living nearby in a quasi off grid manner

1309. doomsayeth

1310. Same with my property

1311.

1312. On both sides are BO properties

1313. Norman Spear

1314. Hillbillies essentially

1315.

1316. doomsayeth

1317. There are security companies who sens guys out to monitor remote properties, I also set up trail cameras, and have a good relationship with the neighbor who lives along the only road access to my property

1318.

1319. Norman Spear

1320. Oh ok

1321.

1322. doomsayeth

1323. [14:43](#) For you that could be a problem

1324.

1325.

1326. Norman Spear

1327. [14:48](#) Right good point

1328.

1329. My initial thinking was the comrade(s) option so good to know I'm on the right track with that. Thanks.

1330. doomsayeth

1331. Yeah, I considered that for my property, I currently have no animals out there, which sucks because they are essential for a successful off grid operation IMO. I would

have to barter or trade for them from locals at extremely inflated prices post SHTF.

1332.

1333. Norman Spear

1334. The reality of my situation is such that I'll never be able to spend adequate amount of time improving the land without help anyway so it would be a fair trade of labor for rent free living and I would pay for the materials.

1335.

1336. It would take a very adventurous soul though

1337. juppi

1338. that sounds like a dream to me

1339.

1340. Norman Spear

1341. Are you volunteering juppi?

1342.

1343. Let's do this.

1344. Although then who will i bug out with back here in the Baltics?

1345. We need to come up with a similar plan for our region.

1346. I have no idea how much land costs in Finland though.

1347. juppi

1348. Owning land here is my goal for now

1349.

1350. Just need to get a job and money first

1351. school is done next year so I will be set for job searching

1352. Norman Spear

1353. Is real estate very expensive in Finland as far as you know?

1354.

1355. juppi

1356. Let me check

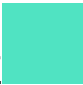

1357.

1358. elksworth

1359. \*\* Unable to decrypt: The sender's device has not sent us the keys for this message. \*\*

1360. Re-request encryption keys from your other devices.

1362. E 

1363. \*\* Unable to decrypt: The sender's device has not sent us the keys for this message. \*\*

1364. Re-request encryption keys from your other devices.

1365. ?

1366. Norman Spear

1367. Nice  

1368. 

1369. In New Hampshire?

1370. juppi

1371. Found a 6 hectare land for sale for 13k euros near me.  

1372. 

1373. Land and water areas

1374. Norman Spear

1375. That's pretty good  

1376. 

1377. elksworth

1378. \*\* Unable to decrypt: The sender's device has not sent us the keys for this message. \*\*

1379. Re-request encryption keys from your other devices.

1380. ?  

1381. E 

1382. juppi

1383. I believe I could do alot with that land  

1384. 

1385. elksworth

1386. \*\* Unable to decrypt: The sender's device has not sent us the keys for this message. \*\*

1387. Re-request encryption keys from your other devices.

1388. ?  

1389. E 

1390. Norman Spear

1391. I don't know I thought that's where you're from

1392.

1393. elksworth

1394. \*\* Unable to decrypt: The sender's device has not sent us the keys for this message. \*\*

1395. Re-request encryption keys from your other devices.

1396. ?

1397. E

1398. \*\* Unable to decrypt: The sender's device has not sent us the keys for this message. \*\*

1399. Re-request encryption keys from your other devices.

1400. ?

1401. Norman Spear

1402. Oh ok

1403.

1404. Yeah you mentioned it in here earlier

1405. juppi: there are some decent size mountains in Finland. Any near you?

1406. I think a mountainous area is best ideally

1407. elksworth

1408. \*\* Unable to decrypt: The sender's device has not sent us the keys for this message. \*\*

1409. Re-request encryption keys from your other devices.

1410. ?

1411. E

1412. \*\* Unable to decrypt: The sender's device has not sent us the keys for this message. \*\*

1413. Re-request encryption keys from your other devices.

1414. ?

1415. Norman Spear

1416. Ok. I thought there were a few mountain areas

1417.

1418. juppi

1419. Only mountains near me are in sotkamo and they belong to the state

1420.

1421. Mountains are up north

1422. Norman Spear

1423. Ah I see

1424.

1425. Probably like arctic conditions up there too

1426. juppi

1427. Yeah its really fucking cold no joke. Also no trees or wildlife around

1428.

1429. Norman Spear

1430. I feel like if SHTF here it'd be safest to bug out to Finland somewhere

1431.

1432. juppi

1433. You can hang out with me. We will fish all day and fire up the sauna every now and then

1434.

1435. elksworth

1436. \*\* Unable to decrypt: The sender's device has not sent us the keys for this message. \*\*

1437. Re-request encryption keys from your other devices.

1438. ?

1439. E

1440. Norman Spear

1441. Sounds good

1442.

1443. I think Russia would get pretty crazy very fast but the Finns maybe can keep their shit together a bit better in general

1444. juppi

1445. If you keep out of bigger cities you would be safe

1446.

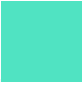

1447. Norman Spear

1448. Random crazy stuff happens here regularly already i can only imagine

1449.

1450. juppi  
1451. We get our random sperg out once in a while too  
  
1452.  
1453. doomsayeth  
1454. Over here in the U.S., we're just getting warned up. You haven't even seen a real sperg out yet.  
  
1455.  
1456. \*warmed  
1457. legionnaire14

1508. As far as I know, there are no states that dont charge property tax.

1509.

1510. There was talk insome areas of Texas to allow alloidal titles that would exempt properties from a proerty tax. But to my knowledge they were not successful.

1532. ?

1533.

1534. doomsayeth

1535. That's true, and since property tax is tied mostly to the value of permitted structures on the land, there are ways around paying too much.

1536.

1537. doomsayeth

1538. Primary arms is having a flash sale on AR/AK components. I saw some decent deals. <https://www.primaryarms.com/AdName+Sale>

1539.

1540. Andras77

1541. <https://www.dailymail.co.uk/news/article-6374085/Secret-plot-200-elite-neo-Nazi-soldiers-German-SAS-slaughter-politicians.html> did you guys see this?

1542.

1543. doomsayeth

1544. Yeah we were talking about it last night.

1545.

1546. Still trying to figure out if it was legit or not.

1547. **Sun, Nov 11 2018**

1551. ?

1552.

1553. doomsayeth

1554. If It's true, they probably figured she was too inaccessible and not worth the risk.

1555.

1556. Arcturus

1557. I can't imagine why they wouldn't at the very least try

1558.

1559. I mean, she's at the center of all of this shit

1560. juppi

1561. Might have something to do with her dropping politics in 2023 or something

1562.

1563. Arcturus

1564. I do question if this is legit though

1565.

1566. very suspect they got caught before they did anything

1567. juppi

1568. One can dream

1569.

1570. I wouldn't be suprised the germans have had it rough these past few years.  
Maybe those dudes thinked that they could make a difference but one snitched out.

1571. Arcturus

1572. Maybe. I wouldn't put it past the german government to fabricate shit like that  
as a scare tactic though

1573.

1574. juppi

1575. True true. Maybe someday something like this would actually happen.

1576.

1577. Andras77

1578. It was probably fabricated

1579.

1580. No fucking way 200 special forces natsocs would go down without a fight

1581. Norman Spear

1582. It was at least exaggerated by the government

1583.

1584. More likely these guy were just shit posting and the gov twisted it into this  
bullshit assassination plot

1585. Arcturus

1586. very possible too

1587.

1588. Norman Spear

1589. Gov trying to make an example out of them and purge ultra nationalists of  
which I'm sure there are many in German SOF units

1590.  
1591. maybe not many but i can see how there'd be a concentration of them in SOF  
1592. \*see  
1593. Plus the media loves to pile on the hype too of course  
1594. And The Sun is rather known for that.  
1595. Hyperbolic tendencies  
1596. Andras77  
1597. Some extreme hyperbole

1598.  
1599. Arcturus  
1600. Can't forget the lefts victim complex as well

1601.  
1602. They get off on having someone trying to victimize them  
1603. Norman Spear  
1604. That too

1605.  
1606. The Sun is almost a tabloid media tier so i can easily see them embellishing like this  
1607. Especially if some of the guys busted were actually NS. You know how unfairly we get treated in the press.

1608. Arcturus  
1609. Yeah, keep in mind they try portraying the proud boys as nazis

1610.  
1611. Norman Spear  
1612. Yeah

1613.  
1614. I'm leaning towards it being bullshit of some kind because what they allegedly were planning would have amounted to a suicide mission

1615. Arcturus  
1616. Without even effecting much in the grand scheme of things

1617.  
1618. Arcturus

1619. <https://www.t-nation.com/living/tip-an-easy-way-to-rid-your-body-of-plastic>

1620.

1621. Related to the plastics discussion yesterday, worth a read
