2. It gotmgerman military personnel to band together to kill politicians.

- 3.
4. And tonplan to massacre immigrants
5. Norman Spear
6. That's true

- 7.
8. Sweden has NRM so that's good at least
9. The most formidable resistance in UK appears to be Tommy Robinson
10. doomsayeth
11. I know a couple of people who would go full Rudolph if there were ever mass grooming gangs raping white girls in their city. I can't imagine what would happen if it was their kids.

- 12.
13. Yeah it's embarrassing, Tommy Robinson is a groveling Zionist.
14. Norman Spear
15. We should take a tit for tat approach

- 16.
17. It makes dealing with the problem more manageable
18. doomsayeth
19. I 100% agree.

- 20.
21. Norman Spear
22. What i mean is we are primarily fighting a psychological war that is itself mostly a media war. That's where it needs to play out.

- 23.
24. doomsayeth
25. Then it gives direct action the appearance of being warranted.

- 26.
27. Norman Spear
28. Yes exactly

29.

30. doomsayeth

31. Say there is a Somali gang in San Diego, and it turns out They have been gang raping white girls.

32.

33. Just hypothetically

34. But not an impossible scenario

35. And the law refuses to act, just like in UK.

36. What could be done?

37. It makes you wonder. Are there men in America who wont tolerate this kind of thing?

38. Norman Spear

39. The good thing about the media is it's triggered easily so it can even be non violent action.

40.

41. doomsayeth

42. True

43.

44. Norman Spear

45. Just need to get creative

46.

47. Non violent doesn't necessarily mean legal in all cases of course

48. doomsayeth

49. Look how much play tommy robinson got

50.

51. For being a retard.

52. Norman Spear

53. Yeah as much as he's a Zionist shill that's a good example

54.

55. Something even as simple as posters placed in a time and place so that they're obviously addressing whatever particular issue.

56. The klan was very good at this kind of thing back in the day.

57. doomsayeth

58. Thats a good start

59.

60. Even warnings

61. Norman Spear

62. Yes

63.

64. doomsayeth

65. Like we heard you're up to some shit, keep fucking around and find out.

66.

67. Norman Spear

68. Think about how the mafia or even street gangs send messages

69.

70. Like that.

71. It doesn't need to be zero or zyklon

72. Think escalation of force.

73. Start out with poster equivalent of horse's head in the bed

74. I guess it's the Italian in me coming out haha

75. The challenge is that requires the ability to react relatively quickly and over large areas potentially

76. Because of short attention span of media and public.

77. Although even a reaction a couple months down the road would probably work if the message was clear and media alerted

78. doomsayeth

79. Yes

80.

81. But i thibk eventually we will be able to project our ideas quickly and across long distances

82.

83. Gremlin changed their profile picture.

84.

85. Norman Spear

86. Working on it.

87.

88. doomsayeth

89. Just by keeping momentum

90.

91.

92. Gremlin changed their display name to Gizmo.

93. 

94. doomsayeth

95. It will feed into itself

96.

97. Norman Spear

98. That's one aspect that can't be left up to chance very much I think

99.

100. doomsayeth

101. One really good opinion could bring in many serious new recruits

102.

103. *op

104. Norman Spear

105. Definitely

106.

107. Kill 2 birds with one stone

108. doomsayeth

109. Go for the fight club effect

110.

111. Norman Spear

112. It requires a degree of strategic thinking & tactical planning that we haven't demonstrated effectively so far

113.

114. But that can be changed

115. doomsayeth

116. Definitely, and you lose alot of steam obly being able to wargame these things online knowing there are faggot feds and tranny clowns potentially spying on your convo.

117.

118.

Norman Spear

119.

Yes. That's why IRL teams are required.

120.

121.

doomsayeth

122.

We'll see if we can make them happen.

123.

124.

Norman Spear

125.

Working on it.

126.

127.

doomsayeth

128.

I've made some good connections already Tbh.

129.

130.

Norman Spear

131.

Yeah very good

132.

133.

Many fail to look at OPSEC practically

134.

How much does it cost the enemy to spy on our online comms? Practically zero dollars. How much does it cost them to spy on our irl convos? Tens of thousands of dollars at a minimum.

135.

Same with time.

136.

Take no time to spy online. Takes weeks to months to sometimes years to spy IRL.

137.

I would say months as a bear minimum in almost every case

138.

To invest that amount of resources takes alot of initiative based upon prioritization.

139.

doomsayeth

140.

All true

141.

142.

And you can guarantee there are bigger fish to fry

143.

At least for now

144.

Norman Spear

145.

Yes

146.

147. That's why i say escalate gradually

148. doomsayeth

149. Maybe not when you are the warlord of the North Western Republic tho...

150.

151. Norman Spear

152. Haha no probably not then but it's worth it at that point

153.

154. doomsayeth

155. Yeah then phase 3 can begin.

156.

157. Thats why it's good that you push preparedness.

158. Norman Spear

159. Yeah that can come in handy regardless of how things play out

160.

161. doomsayeth

162. Honestly if I got doxxed right now, I would definitely lose my job

163.

164. But thats it

165. I have resources. They couldnt touch me financially. My family would still be fed. And if they ever did find my property, stepping one foot onto it would be a death sentence.

166. Norman Spear

167. Yes that's the most immediate practical reason for self sufficiency

168.

169. doomsayeth

170. Im talking about leftist antifa types obviously

171.

172. Norman Spear

173. Yes

174.

175. doomsayeth

176. The feds would just Waco my ass

177.

178. Norman Spear

179. Right. Which is why in the current phase we need to be as covert as possible.

180.

181. But as things accelerate we can become clandestine and then further down the road just right out in the open ideally

182. doomsayeth

183. Yup

184.

185. Norman Spear

186. For now we need non-attributable actions but that will still send a message and/or add to acceleration as much as possible

187.

188. And be less concerned with legalities and more concerned with not getting caught. Even legal actions can have serious repercussions if caught so in a sense it really doesn't matter how legal something is or not practically speaking.

189. That's how risk should be measured. Can I do X and reasonably get away with it.

190. Forget about legality. Everything we potentially do can get us in trouble potentially m

191. doomsayeth

192. Yes that should be the principle that guides every OP.

193.

194. I definitely agree with your manifesto

195. Norman Spear

196. Yeah if you can't put up posters without getting caught don't do it.

197.

198. There are guys in UK spending years in prison for posterizing

199. doomsayeth

200. A good example is loom what they are doing to that kid putting up the "It's OK to be white posters" recently, they launched a full manhunt.

201.

202. Here in the U.S. at least, they can still get you. 1st amendment be damned.

203. Norman Spear

204. Yes. But doxing etc can still be very damaging

205.

206. That dude that went to cville committed suicide from being doxed
207. doomsayeth

208. Yeah, they ruined his life

209.

210. And reveled in it

211. Norman Spear

212. [23:25](#) We're at war. This shit isn't a game.

213.

214. doomsayeth

215. [23:25](#) That's the twisted shit that we're up against.

216.

217. Norman Spear

218. Yup. They've killed him themselves if they could get away with it.

219.

220. doomsayeth

221. That's the thing about them, theybare such pathetic cowards, but every little post they make every little dox they carry out, is a gun to your head, russian roulette 24/7, with each pull of the trigger they are hoping that the next one blows your brains outm

222.

223. Norman Spear

224. Yes. In the current phase arguably the only direct action that should be attributable to a specific org or group is if it's only intended for recruiting purposes.

225.

226. Anything else should be non-attributable

227. The message should speak for itself

228. doomsayeth

229. Same page

230.

231. Norman Spear

232. But there also needs to be a clear message

233.

234. Ideally.

235. It's something that should be consciously aimed for at least.

236. doomsayeth

237. A message to the people?

238.

239. Like our people

240. Norman Spear

241. To everyone

242.

243. doomsayeth

244. Or to broader society?

245.

246. Ok

247. Norman Spear

248. The media primarily so they can transmit for us

249.

250. Use the media as a relay

251. doomsayeth

252. One thing I really admired about 4chan anons was how absolutely devastating their psyops were to the media.

253.

254. cempa

255. Epic in its effects.

256.

257. doomsayeth

258. Leftist reporters so desperate for a story that confirms their bias

259.

260. Truly epic.

261. cempa

262. Baiting the trap with the MSM greed.

263.

264. doomsayeth

265. Yeah, we should supply the rope and the media and their army of liars will hang themselves with it.

266.

267. Norman Spear

268. Yeah that's a good way to look at it

269.

270. Yes

271. ronroman

272. Did y'all see what trump said about Antifa?

273.

274. doomsayeth

275. When?

276.

277. ronroman

278. Soco tweeted it

279.

280. Not sure

281. Recently

282. doomsayeth

283. Did he say fuck them with a pitchfork?

284.

285. cempa

286.

287.

288. doomsayeth

289. Ron how dare you leave us hanging like that bruh

290.

291. Norman Spear

292. I think he's referring to the Tucker Carlson Antifa protest in front of his house. Trump made a comment about it that Antifa should be careful not to trigger "the other side" because they're angry and tougher. Something to that effect.

293.

294. doomsayeth

295. God if only Trump was as good as his shit talk.

296.

297. And not a shabbos

298. Alright folks, good night! Or whatever time of day it is in Siberia.

299. Norman Spear

347.

348. Grimoire

I think DS turned gay around the time they started pushing amnat and bashing anyone who wasn't on board

411.

412.

Granted the whole black clad streetwalking thing (or just streetwalking in general) is a bad idea and counterproductive, but still, dumb reason to schism

413.

it was especially precious since DS is and was edgy as fuck, moreso than most of the people they schismed with

414.

Grimoire

415.

it feels like it

424.

425. doomsayeth

426. And dont think that gun laws and immigration amnesty are the only thing this new commie majority in the house is cooking up. Regulating and criminalizing "hate speech" is going to be included, I can almost guarantee it.

427.

428. charnaz1488

429. It's always been in complete Zionist control the house the Senate all of it our government is a joke and has been since we took money from a kike to fund the revolution

430.

431. Grimoire

432. yeah, i agree. they are going to clamp down really hard on anything they can call hate speech or thought crimes or some other ridiculous bullshit if they get there way

433.

434. i dont think it would get as bad as it is in the uk, but it would get quite a bit worse in the regards of free speech

435. charnaz1488

436. They're definitely gonna fuck with free speech and guns soon enough but we have enough constitutionalists to keep them slightly at bay
