16. Thanks for that man I'm literally only in the beginning stages and re-evaluating my bug out bag situation. What is the your ideal bug out bag? I have a large U.S Military Vietnam issued backpack that I use.

- 17.
  18. Norman Spear
  19. A good place to start is with the books in our mega library. The link is in the room description. There are some specifically about bugout bags.
- 
- 20.
  21. Generally the biggest consideration is weight vs how many days it's going to take you to reach your bugout location.
  22. Rule of thumb is pack for 72 hours
  23. General item categories to plan for are fire shelter, water, food, first aid, self defense
  24. Somewhat obvious but good to keep these categories in mind while selecting different items. Ask yourself which of these categories does the particular item you're considering fall into.
  25. It's good to have a back up item for each category. So for fire starting, a lighter and a ferro rod for example.

26. One of our members Social Conquest did this awesome thread on the topic which I recommend reading through too

27. <https://twitter.com/EmpireGenerator/status/1050722688476549121?s=19>

28. Norman Spear

29. So one way to decide on an actual bag is to decide on your items first and then get a bag that will accommodate

30.

31. Norman Spear

32. Successful acceleration entails increasing civil disorder enough that it strains System resources & therefore ability to contain it sufficiently. In that regard there's no difference between successful acceleration from widespread street crime & from frequent political violence.

33.

34. Norman Spear

35. Economic disruption must flow from that rather than the other way around. Meaning that local economies suffer losses and businesses are often forced to close as the result of persistent civil disorder

36.

37. doomsayeth

38. I can see things picking up dramatically in the next few years.

39.

40. Norman Spear

41. That's appears to be the current trajectory but there also seems to be a bit of ebb and flow to it which concerns me

42.

43. I also don't underestimate the ability of our enemies to manage the situation

44. Probably through deflection mainly

45. \*distraction

46. doomsayeth

47. True

48.

49. I foresee an increase in racially motivated lone wolf attacks though

50. Which will be hard for TBTB to manage

51. As far as propaganda

52. \*TPTB

53. IMO There will be another big market disruption in December when the FED raises the funds rate again.

54. It could be a huge catalyst for civil unrest. The global economy lost 8 trillion in value in 5 days last week.

55. Norman Spear

56. I don't think there will be a repeat of 2008 unless TPTB want it and i don't think they do.

57.

58. Unless they're so frothing at the mouth over Trump to shoot themselves in the foot like that

59. It would be foolish though

60. doomsayeth

61. I think they will use Trump as a scapegoat to reset the global economy.

62.

63. The current system is untenable, and they need a smokescreen to transition to whatever they have planned to replace it.

64. Norman Spear

65. That would make sense

66.

67. They'd be doing us a huge favor

68. Andras77

69. The Great Depression is a great example of this

70.

71. Or even the dust bowl

72. The system changes violently

73. doomsayeth

74. Tbh , I think it would only be beneficial if we have some infrastructure or organization in place.

75.

76. Andras77

77. A reset is coming

78.

79. Norman Spear

80. There are so many measures in place post 2008 to prevent it from repeating so it just makes it hard for me to imagine how they'd do it technically speaking

81.

82. Andras77

83. Infrastructure only benefits the anti guerrilla

84.

85. Norman Spear

86. Definitely

87.

88. doomsayeth

89. I mean an organizational infrastructure

90.

91. Andras77

92. The Vietcong never stayed in the cities or near railways

93.

94. They hid in the jungle

95. Norman Spear

96. I just like to focus on factors that we can most successfully influence so that's why I tend not to place much hope on things like economic crash

97.

98. doomsayeth

99. The vietcong were receiving massive financial and material support from the commies

100.

101. China and russia

102. Norman Spear

103. Either way we need organizational infrastructure for sure

104.

105. I think focusing on the civil disorder and political polarization is most useful as a proactive strategy

106. And let that then have the second order effect on the economy

107. Or kill two birds with one stone. I'll let you use your imagination there.

108. Andras77

109. I am just waiting for a deranged leftist to kill trump

110.

111. Would be amazing

112. Norman Spear

113. Or impeachment. That'd probably be more likely

114.

115. But even that would be pretty dumb for them to do. Magatards would lose their minds.

116. Andras77

117. It would probably result in more maga terrorism

118.

119. Hopefully it actually works this time

120. Norman Spear

121. Yeah it would for sure & play right into our hands.

122.

123. Acceleration boils down to maximizing civil disorder whether it's due to politics or economics.

124. Why civil disorder is so critical in particular is because it eats up System law enforcement resources.

125. This is a tangible and measurable effect.

126. When law enforcement resources have been maxed out, that's when the military is brought in.

127. That's the make or break moment.

128. It's the final boss.

129. doomsayeth

130. Martial law is best case scenario

131.

132. As far as waking people up and frocing them to act

133. \*forcing

134. Norman Spear

135. Yes it'd be impossible to ignore and would dominate headlines worldwide really

136.

137. But that'll only happen if things accelerate very quickly in a relatively short period of time

138. doomsayeth

139. I.E. Boston marathon bombing, stephen dorner attacks in Cali

140.

141. Norman Spear

142. Also needs to be sustained though

143.

144. If it ends that means we lost

145. Or we won but that's gonna take a while

146. Although I suppose multiple short term declarations of martial law would have a cumulative effect so that would probably be equally effective

147. But again the intervals between would need to be short. Also ideally concentrated as possible on the same geographic area but that less likely to be possible i think.

148. However it may be necessary to be geographically concentrated in order to exhaust law enforcement resources in that area rather than spreading thin and the System being able to absorb.

149. The geography part is where things get tricky.

155. We won't even shoot at IED emplacers in Afghanistan but fingers crossed.

156.

157. d00mr

158. Big gay. Every time I get excited about this border shit it always turns out to be a big gay nothing burger. He's going to use engineers to build migrant camps, not a wall or even better mass graves.

159.

160. The Guard have been cleaning up horse shit during their rotational deployments.
161. 40,000 people are going to get state of the art facilities with free health care to boot.
162. doomsayeth
163. Some are.
164. 
165. The Border Patrol has been in several uses of deadly force for rock throwing incidents recently. I can imagine a mob on the border getting pretty aggressive.
166. It's not hard for me to envision a deadly force scenario by military.
167. d00mr
- 168.
169. From what I've read, the bulk of who's going are engineers, medical personnel, trans personnel and MP's.
170. Engineers will probably build migrant camps, or if Trump uncucks, the wall.
171. Medical personnel are self explanatory
172. Trans personnel are self explanatory
173. MPs assist and advise police work, or will be in charge of securing the migrant camps
174. 
175. The only combat personnel there are the MPs and maybe some engineers.
176. I can't really see any of them opening fire on the migrants
177. All MPs are trained to do infantry type stuff every once in awhile, but most will spend their enlistments being gate bitch.
178. [13:07](#) I am 200% skeptical about all of this
- 179.
180. Norman Spear
181. They've been trained so well *not* to use deadly force that it shouldn't be an issue when ordered not to in this situation i think.
182. 
183. I could more likely see the military refusing orders to shoot on the migrants
184. doomsayeth

204.

Alright. I see alot of MP's patrolling in my city for some reason

205.

206.

d00mr

207.

I think that this'll be a purely humanitarian mission. The wild west ROE's of Iraq and early Afghanistan are over. The US also can't shoot on ""refugees"" without the International community shitting the bed.

208.

209.

juppi

210.

They will let atleast some in

211.

212.

214.

215.

d00mr

216.

Agreed

217.

218. doomsayeth

219. But dont forget, BP agents are also in the picture, and there has been a recent uptick of violence on the border already.

<https://www.nbcsandiego.com/news/local/Border-Patrol-Agent-Shot-At-Near-San-Ysidro-Border-Crossing-492827091.html?amp=y>

220.

221. Norman Spear

222. They'll probably need to be a degree of negotiation with the caravan leaders before they get to the border. The Mexican government will be involved in that respect i imagine.

223.

224. NGOs who are facilitating all this will also make sure the migrants stay peaceful.

225. Plus these people do genuinely want to enter the US so it's in their best interest to cooperate. So I think with all that in place it can expected to be peaceful.

226. The next agitation attempt by the anti-Trump crowd will be over how long the migrants are kept in the tent city being built.

227. They'll say it's inhumane etc

228. I think the only wild card would be if some gung-ho patriot militia types decide to attack the caravan. Probably would be a lonewolf though if it happened.

229. Very unlikely of course

230. doomsayeth

231. Several texas militias are mobilizing

232.

233. Bunch of maga fudds running around

234. Norman Spear

235. See that's the only thing i can see being a spark to violence

236.

237. Again fingers crossed although i sorry if you end up having to deal with it.

238. Some militia-type shoots at the caravan and the caravan counter attacks haphazardly and then all shit breaks loose.

239. doomsayeth

240. Yeah, I just get a kick out of wargaming these events. Watching how each party reacts.

540.

How was book club?

541.

cadiantrooper

542.

Went really well. We have a cap of 4 people for Riot voice calls so we've migrated the conference call function to a Discord server.

543.

544.

545.

Good stuff. Guess I'll have to DL discord. I'm going to day shift next week so It should be easier to make it to future book clubs.

581. We're only going to use the voice chat for the book club. But if you think it's not worth the risk we can use another platform.

582.

583. d00mr

584. Wouldn't trust Discord either. I don't buy into the ADL thing, but they're certainly compliant. They will however data mine your activity on your phone or PC. There's a reason why it's free.

585.

586. Also good morning everyone

587. Arcturus

588. Wouldn't be surprised if they do

594. Was it Wire? That would be better

595.

596. End to end encryption, still free but they offer corporate solutions so it's transparent how they make their money, and it's open source so their code can be independently audited

597. Norman Spear

598. [06:21](#) No it wasn't Wire. But that's probably a good option too.

1336. verdomme

1337. Oh right

1338.

1339. My mistake

1340. Arcturus

1341. for them, I dunno. 5%? when the time comes where we CAN enact that the exact beliefs of individuals on that probably won't matter since we won't be the policy makers, realistically

1342.

1343. verdomme

1344. anything over 2% is too much

1345.

1346. In an ideal world anyone with a smidge of non-european would be undesirable

1347. Arcturus

1352.

1353. It's leanient

1354. Arcturus

1355. initially you may have some slightly mud people, over time it would be bleached to the point of non-existence imo

1356.

1357. Norman Spear

1358. As far as dna tests go i agree around 2% is within the range of statistical error assuming phenotype checks out.

1359.

1360. verdomme

1361. Agree

1362.

1363. Arcturus

1364. because racially mixed people are already a pretty small portion of the population - especially in the PNW which is the only geographical area I'm talking about for the future

1365.

1366. verdomme

1367. If you have any racial impurity you shouldn't breed unless you've got some amazing genes

1368.

1369. Arcturus

1370. some sub 3% of the population that fits 1/8 or less of anything other than nigger or heeb will not realistically have an impact IMO

1371.

1372. verdomme

1373.

1374. because racially mixed people are already a pretty small portion of the population

1375.

1376. Where did that info come from

1377. Arcturus

1378. especially considering post independence we really will not have the resources to go gestapoing around giving everyone DNA tests

1379.

1380. Norman Spear

1381. Let's take this example: dna test says 5% Mongolian but genealogy doesn't back it up and phenotype is totally Nordic. I would consider that person White.

1382.

1383. Arcturus

1384. population of the PNW is roughly 75% white, at a minimum

1385.

1386. verdomme

1387. Same

1388.

1389. Arcturus

1390. the nonwhites will mostly be purebred (relatively speaking) and those who fit the 1/8 or less not nigger or heeb probably make up like 3%

1391.

1392. Norman Spear

1393. I place genealogy and phenotype above today's dna tests

1394.

1395. Arcturus

1396. maybe less idk

1397.

1398. verdomme

1399. Why is the PNW such a large talking point for you

1400.

1401.

1402.

1403. Norman Spear

1404. I place genealogy and phenotype above today's dna tests

1405. True

1406. Arcturus

1407. because that's what I think is our realistic solution

1408.

1409. verdomme

1410. Why and how so?

1411.

1412. Arcturus

1413. taking back all of america is unfeasible

1414.

1415. now for you, this shit doesn't matter because you're not american

1416. so unless you plan on moving here you're not in the equation

1417. but for america, the PNW is a realistic area we could take

1418. taking back all of it is completely unfeasible 1: given our numbers 2: given that ZOG would not let go of all of it

1419. 3 states if they're enough trouble they may be convinced to let split off

1420. verdomme
